Adaptive Learning Platform

EDTECH | PRODUCT

A Python and React learning platform that meets every student at their own level.

Overview

An adaptive learning platform where students work through lessons and quizzes, and the system suggests the next content based on their progress. Teachers and admins get progress tracking and reports.

Key Features

- Adaptive learning path: the next lesson matches the student's level
- Quizzes and practice sets with instant feedback
- Student progress and mastery tracking
- Teacher dashboard with class and individual performance
- Content management for subjects, topics, lessons and questions
- Role-based access for Admin, Teacher and Student

Modules in Detail (6)

1. Courses & Content
Subjects, topics and lessons organised in a clear hierarchy, with text, video and practice questions attached to each lesson.

2. Quiz Engine
Quizzes and practice sets drawn from a question bank, with instant marking, explanations and difficulty levels.

3. Progress Tracking
Tracks mastery per topic for every student and uses it to decide what they should study next.

4. Teacher Dashboard
Class-wide and individual performance views so teachers can spot struggling students early.

5. Admin Panel
Manage users, classes, subjects and platform settings from one place.

6. Reports
Exportable progress and performance reports for students, classes and the whole institution.
