Restaurant Management & POS

RESTAURANT SAAS | SAAS

A multi-branch restaurant SaaS: POS, kitchen, delivery and supply chain.

Overview

A SaaS system for restaurants that handles dine-in, takeaway and online delivery orders. A master branch controls all branches, with supply chain and integrations included.

Key Features

- Restaurant POS for dine-in, takeaway and delivery
- Multi-branch setup with master branch control
- Menu, recipes and kitchen flow
- Supply chain and stock
- Online delivery management
- Subscription-based SaaS tenants

Modules in Detail (7)

1. POS
Fast order taking for dine-in, takeaway and delivery, with split bills and printed receipts.

2. Menu & Recipes
Menu items, variants and recipes that link to ingredient stock.

3. Branches
A master branch controls menus, prices and users across all branches.

4. Supply Chain
Purchasing, supplier management and stock transfers between branches.

5. Delivery
Online and phone delivery orders with rider assignment and status tracking.

6. Reports
Sales, item-wise, branch-wise and stock reports.

7. Billing & Plans
SaaS subscription plans, tenant onboarding and plan limits.
